Stew King joins Sensetech Systems

Sensetech Systems is thrilled to announce the appointment of Stew King to the newly created role of Specialist Systems Manager.

This appointment coincides with the launch of our new division, Sensetech Specialist Systems. The division's initial focus will be the integration of the Lehavot KitchenShield system—an exciting addition to our core Fire & Security business. This move enables us to expand into the wider fire protection market, offering fully certified, cost-effective solutions with a strong emphasis on customer service for both new and existing clients.

Stew brings over 30 years of experience in the fire industry, having served as a firefighter and later as a technical sales professional. For the past 18 years, he has been deeply involved in kitchen fire suppression, successfully managing major accounts and large-scale rollouts.

Looking ahead, Sensetech Specialist Systems plans to introduce additional disciplines in the coming months and years, further strengthening our capabilities and commitment to innovation in fire protection.
